COST STRUCTURE			REVENUE STREAMS	
• Gemini API usage costs • Hosting & infrastructure • Development & maintenance			• Freemium subscriptions • Premium plans • Institutional partnerships	

InterviewAI turns Gemini-powered adaptive mock interviews into measurable performance gains for job seekers, graduates, and bootcamp students preparing for their next role.

Why It Wins

PROBLEM	Candidates rehearse alone — no realistic practice, no objective feedback, no measurable progress.
SOLUTION	Gemini-powered interviews that adapt to every answer, plus CV analysis and a scored report per session.
WHY NOW	Frontier LLMs made real-time, role-specific interview simulation viable and cheap for the first time.
MOAT	Proprietary question/CV corpus, scoring rubrics tuned on real sessions, and institutional distribution.
ECONOMICS	Gemini tokens are the only real variable cost; free-tier caps protect margin, urgency drives conversion.
MARKET	Job seekers in Egypt, MENA, and globally — concentrated in technology and software roles.

Institutional distribution buys the cohort. Adaptive scoring keeps the candidate. Prompt efficiency keeps the margin.
